Chapter 1. Adding

What is addition?

Addition is a mathematical operation that allows you to find the sum of two numbers.

In the addition process, we add one number to another and the sum is the result.

The plus (+) button expresses the addition operation in the app.

How to add

Use the calculator to add.

Understand [What is addition? \(on page 3\)](#).

1. Enter the first number.
2. Choose the plus (+) button.
3. Enter the second number.
4. Choose the equal (=) button.

The calculator displays the result.

You want to add 2 to 3. The equation will be $3+2=5$. Enter 3. Press plus. Enter 2. Press equal. The calculator displays the number 5.

Chapter 2. Subtracting

What is subtraction?

Subtraction is a mathematical operation that allows you to find the difference of two numbers.

In the subtraction process, we take away one number from another and the remainder is the result.

The minus (-) button expresses the subtraction operation in the app.

How to subtract

Use the calculator to subtract.

Understand [What is subtraction? \(on page 4\)](#).

1. Enter the first number.
2. Choose the minus (-) button.
3. Enter the second number.
4. Choose the equal (=) button.

The calculator displays the result.

You want to subtract 2 from 3. The equation will be $3-2=1$. Enter 3. Press minus. Enter 2. Press equal. The calculator displays the number 1.

Chapter 3. Multiplying

What is multiplication?

Multiplication is a mathematical operation that allows you to find the product of two numbers.

In the multiplication process, we multiply two numbers and the product is the result.

The asterisk (*) button expresses the multiplication operation in the app.

How to multiply

Use the calculator to multiply.

Understand [What is multiplication? \(on page 5\)](#).

1. Enter the first number.
2. Choose the asterisk (*) button.
3. Enter the second number.
4. Choose the equal (=) button.

The calculator displays the result.

You want to multiply 2 and 3. The equation will be $3*2=6$. Enter 3. Press asterisk. Enter 2. Press equal. The calculator displays the number 6.

Chapter 4. Dividing

What is division?

Division is a mathematical operation that allows you to find the quotient of two numbers.

In the division process, we divide one number by another and the quotient is the result.

The slash (/) button expresses the division operation in the app.

How to divide

Use the calculator to divide.

Understand [What is division? \(on page 6\)](#).

1. Enter the first number.
2. Choose the slash (/) button.
3. Enter the second number.
4. Choose the equal (=) button.

The calculator displays the result.

You want to divide 6 by 3. The equation will be $6/3=2$. Enter 6. Press slash. Enter 3. Press equal. The calculator displays the number 2.
